SUMMARY

Analytical B.Tech CSE (IoT) student with a strong foundation in Python, Java, software engineering, data analysis, and AI-based applications. Interested in CERN's Short-Term Internship to gain practical technical training, contribute to real projects, and apply problem-solving, technical documentation, teamwork, and communication skills in a multicultural environment.

WORK EXPERIENCE

Google Student Ambassador | Google Developer Programs May 2026 – August 2026

- Promoted Google technologies and developer programs within the student community.
- Organized and supported technical sessions, peer learning activities, and community events.
- Strengthened communication and teamwork skills by coordinating with students, sharing technical updates, and supporting peer learning.

AI & Data Science Virtual Intern | EduSkills July 2025 - Dec 2025

- Completed practical simulations in AI, machine learning, and data analytics workflows.
- Worked on data preprocessing, model evaluation, and problem-solving tasks using structured datasets.
- Gained hands-on understanding of the data science lifecycle and AI project development.

Data Science Intern | SkillDzire May 2025 – June 2025

- Performed data preprocessing and exploratory data analysis using Python.
- Applied machine learning concepts to identify patterns and support data-based decisions.
- Prepared clear analysis outputs and improved problem-solving through structured technical workflows.

EDUCATION

B.Tech in Computer Science and Engineering (IoT) August 2024 – May 2028 Ramachandra College of Engineering

- Pursuing specialization in IoT with focus on software development, embedded systems, data analysis, and AI applications.
- Building a strong foundation in programming, problem-solving, computer science fundamentals, and practical project work.
- CGPA: 7.2/10

Intermediate (MPC – Mathematics, Physics, Chemistry) April 2022 - May 2024

- Sri Chaitanya Junior College
- Developed a strong base in mathematics, physics, logical reasoning, and analytical problem-solving.

ADDITIONAL INFORMATION

- **Technical Skills:** Python, Java, C, C++, SQL, Git/GitHub, Object-Oriented Programming, Data Analysis, AI/ML Basics, IoT Fundamentals, Embedded Systems Basics, Technical Documentation, Problem-Solving, Team Collaboration, Communication Skills.
- **Languages:** English, Tamil, Hindi, Telugu
- **Certifications:** Java Programming Fundamentals, GitHub Copilot Tools, AI-Assisted Development, Azure Language in Foundry Tools.
- **Awards/Activities:** Selected as Google Student Ambassador, representing Google developer programs and supporting technical learning within the student community.
